

Gateway - some ideas for everyday use:

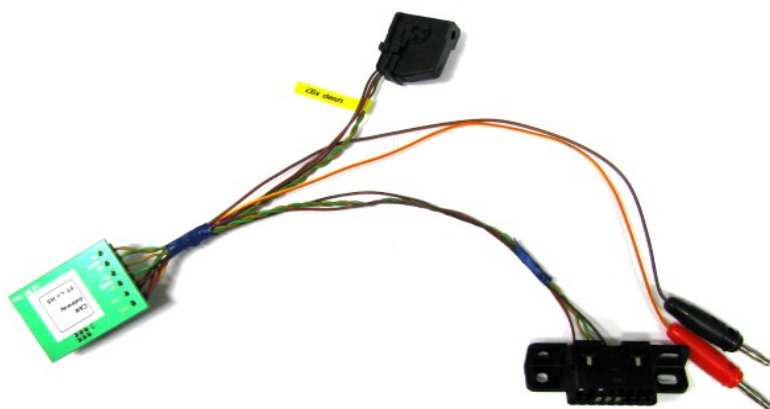

FRM3R

using CAN HS-FT gateway

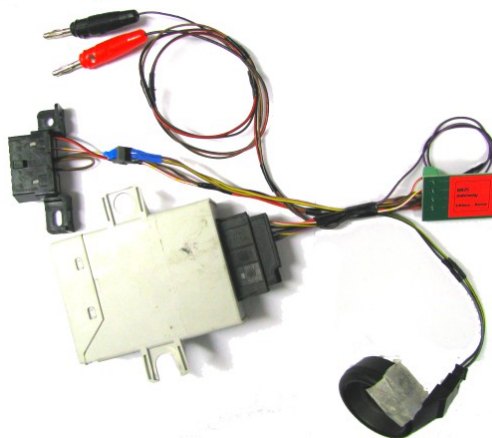

E6x dashboard

using CAN HS-FT gateway

Cable for EWS:

any K-line adapter via **I-bus** gateway:

Overall:

- it is possible to test various control units without original CAS (with valid key), JBBF, KGM, KOMBI.... ;
- just some wires, IGN ON (Kl.15) signal with a single jumper;
- reprogramming is much faster because original car network is bypassed.
