

Mbcan Mbir MBkey

update instructions

how to obtain update for MBir / MBkey / MBcan:

- download update utility. Each tool (MBkey, MBir and MBcan) has its own one, update principles are the same;
- disconnect any 3rd party hardware from USB and attach tool, launch appropriate software. If everything is OK serial number is shown at the top of form like shown in picture:

- press button **Read**;
- if everything is OK, green "check" is shown informing that data is collected;
- go to directory from where you launched update utility and find file with name like this: MBir4D49001E.req (instead of 4D49001E you will see serial number of your device);
- send us this file by e-mail. Let us know if you need any optional software.
- in case if you already have some additional software purchased before, let us know!

if everything is OK, you will get a license file from us. If so, launch update utility again -

- disconnect any 3rd party hardware from USB before!
- press **Update**, file load dialog will open;
- choose file you got from us, press **Open**;
- if success green "check" will become visible;
- device is ready for new software / options.

IMPORTANT: don't try to update device with update file designed for another device! Most likely nothing will happen, but who knows...
